

Flocer Angelo Bustamante

Front-end Developer

PROFILE

I'm a junior Computer Science student currently studying at Caraga State University and seeking an internship where I can leverage my experience in building responsive and scalable web projects that delight end-users. Experienced in web development, Git management, and applying data structures to other aspects of projects. Proficient in working in a team environment and motivated to learn from other developers while sharing innovative ideas in an environment that values personal growth.
